**ADMINISTRATIVE RULE  
FISCAL IMPACT STATEMENT**

**PROPOSED RULE:** LSA #01-95  
**STATE AGENCY:** IDEM

**DATE PREPARED:** Mar 10, 2003

**Digest of Proposed Rule:** This rule is being initiated due to the new federal Phase II program regulations for storm water discharges. The National Pollutant Elimination System (NPDES) storm water Phase II final rule was published on December 8, 1999, at 64 FR 68722. Therefore, amendments to 327 IAC 15-5, storm water run-off associated with construction activity, and 327 IAC 15-6, storm water discharges associated with industrial activity, seek to modify and revise the existing rules to add the federal Phase II requirements, add changes to the Phase I program, and add clarity and effectiveness to the existing program. Revisions are also being made to 327 IAC 15-2 and 327 IAC 15-3, to bring them in line with the proposed amendments to the storm water rules.

**Governmental Entities:** There are no unfunded mandates placed upon any state or local agency by the proposed changes.

**Regulated Entities:** The rule would designate three new industrial sectors for regulation that are not under the current federal storm water program. The three new sectors are:

- (1) Agricultural fertilizer/pesticide storage facilities;
- (2) Truck refueling facilities with on-site vehicle maintenance operations;
- (3) Solid waste transfer stations.

The proposed rule would affect an estimated 730 facilities. Total annual cost for these regulated entities is estimated to range from \$1,433,720 to \$1,941,800. A breakdown of costs incurred is listed in the table below.
